EXPERIENCE

Amazon Web Services

Seattle, WA

Systems Development Engineer II – Amazon CloudWatch Logs

September 2021 – Present

- Leading a strategic multi-year program across 14 teams to modernize cloud infrastructure through modular Layer 3 (L3) Cloud Development Kit (CDK) Constructs - improving service deployment efficiency and operational reliability.
- Led global IPv6 connectivity program across 40+ regions (including commercial and government clouds), orchestrating complex coordination between 10+ cross-timezone teams, while supporting 10Tbps+ traffic without any customer impact.
- Led and scaled distributed logging infrastructure across global regions, handling 8Tbps+ traffic with 99.95% SLA while ensuring zero data loss for critical internal services.
- Led multiple cost optimization initiatives through cross-team collaboration, delivering \$120K+/month immediate savings and projected \$1M+ reduction in infrastructure costs over 3 years.
- Led secure logging compliance implementation for commercial, government cloud & classified AWS regions, enabling regulated customers to meet stringent security requirements.
- Architected critical expansion to 4-zone infrastructure to address scaling limitations, improving service capacity while achieving a 40% reduction in network traffic.
- Reduced service endpoint build durations by 50% through process optimizations and parallel executions, accelerating service availability across global regions.
- Demonstrated technical leadership through infrastructure automation, design reviews with senior technical leaders, and serving as Scrum master to drive quarterly planning and operational excellence.
- Led critical infrastructure changes through comprehensive documentation, peer reviews, and change management processes to ensure operational safety.

Cloud Support Engineer II – Developer and Mobile Services

October 2020 – September 2021

- Accredited AWS Lambda Subject Matter Expert (SME)
- Worked with internal Lambda and SNS service teams to address escalations and any service-related anomalies.
- Provided training sessions on serverless services for external candidates outside of AWS.
- Worked with AWS SAs and TAMs on Infrastructure Event Management (IEM) to plan and execute critical business events.

Cloud Support Engineer I – Developer and Mobile Services

June 2017 – October 2020

- Helped architect the Government of Ireland's Health Service Executive (HSE) COVID-19 contact tracing application.
- Worked on escalated enterprise & business customer cases, and internal tickets with AWS service teams and support engineers.
- Worked on serverless compute, messaging & queuing, API, and database services, along with Storage and Delivery Services.
- Assisted in developing tailored AWS integration solutions optimized for cost efficiency and performance for AWS customers.

Marketing Relevance, LLC

Chicago, IL

Full Stack Web Developer

August 2016 – May 2017

- Designed, developed, and deployed secure websites using the LAMP stack with the Foundation framework.
- Accelerated sales of homebuilder clients using industry-leading mobile-first design, increasing the overall conversion rate to 5%.
- Created high-fidelity website prototypes and wireframes as initial designs during client discovery calls.

SKILLS

Programming Languages: Python, Ruby, TypeScript, Bash, Java, HTML, CSS, JQuery & MySQL

AWS: CloudWatch Logs, CloudFormation, Kinesis Data Streams, DynamoDB, EC2, S3, SNS, SQS, AutoScaling Group, VPC & Route53

Other: Amazon Web Services (AWS), CDK, Distributed Systems, Docker, Cloud Computing, Linux, Git, GitHub, LAMP Stack & REST API

EDUCATION

UNIVERSITY OF ILLINOIS AT CHICAGO

Chicago, IL

Master of Science in Computer Engineering - GPA: 3.5/4.0

May 2016

- Implemented a cross-platform text messaging application developed in C++ and Android for Windows, Linux & Android.
- Developed face detection and face recognition using Fisherfaces and Eigenfaces in MATLAB.
- Related Coursework: Computer Algorithms, Software Engineering, User Interface Design, and Mobile App Development.

UNIVERSITY OF MUMBAI

Mumbai, India

Bachelor of Engineering in Electronics Engineering – Distinction Class

May 2014

- Executed live streaming project with Adobe Media Encoder, peaking bandwidth usage at 30GB.
- Co-authored - "Design, Modeling, and Implementation of 8-bit Processor for Intelligent Automatic Chocolate Vending Machine" technical paper. Published in International Journal of Computer Application (ISBN# 973-93-80880-67-5)
